WHY CHOOSE HEAT INNOVATIONS?

Did you know?

We have been in business since the 70's.

We carry the insulation and vapor barrier for under your concrete floor.

We ship all over Canada.

No one else in the market offers a better built product.

We offer High Quality Natural Gas, Electric, Propane, Oil and Wood fired boilers.

CONSIDER THESE POINTS WHEN DECIDING WHERE TO BUY YOUR FLOOR HEAT SYSTEM

Hydronics is all we do. We have chosen just one sector of the market to focus on so we can be experts in that field. We devote our full time resources to giving the best products and services for the most comfortable and economical heating system for your money.

Our boilers carry industry leading warranties. Ie. Thermolec electric boiler elements are 10 years! Most of our competition offers only 2 years.

All of our boiler boards are crafted and designed using Canada building codes and the best hydronic practices.

Our technicians and sales team are experienced and trained hydronic designers by the Canadian Institute of Plumbing and Heating (CIPH).

We use the highest quality products, like Caleffi brass air and dirt separators, Wasser circulator pumps, Wasser brass distribution manifolds, Wasser PEX and PAP pipe with EVOH oxygen barrier.

We put heavy effort into our buying and sourcing practices and negotiate the best prices available in today's competitive market. We buy commercial volumes and pass the savings on to our customers. This allows us to offer great products at great pricing without sacrificing quality.

We strive to give you the best service possible, from answering your phone calls with a real person, to speaking with you on troubleshooting, install help or just to hear from you about how much you like your system.

Professionally Designed
Cost Effective Heating Solutions
